l) Question

CAFO in Idaho-Feedlot discontinued operation in 1995, leaving standing piles of manure. Obtained permit #IDG010027 in 1997. Permit expired May 27, 2002. Stockpiled manure remains. Is not contained in any way. Does 40 CFR 122.23(f)(1) require additional permit? Is not, is any "compliance required? Per permit, affected watershed is 1750114, Lower Boise, Idaho; Boise River. Thank you
